

# WebSearch for HPE RM / CM

Enabling secure read-only 'anywhere' access to HPE RM / CM documents.

- Highly customisable to your organisation's branding and search requirements
- Allows read only access from phones and tablets
- Safe and secure access to specific documents; downloaded documents are read-only and cannot be edited.
- Can be used with HPE RM / CM Guest logins providing public access to specific documents
- Documents sent to internal staff retain the security and access applied in HPE RM / CM.
- Document recipients(s) do not require access to HPE RM / CM Desktop.

## Customised Interface

Our team of engineers will customize WebSearch to your organisations search needs – enabling simple 'one-word' searches and pre-built links.

Title	Code	Type	Owner	Description
Academic Board Rules	UR001	University Rule	ECU Council	These Rules are made pursuant to Statute No. 24 Academic Board
Academic Misconduct Rules (Students)	UR002	University Rule	ECU Council	These Rules are made under Statute No. 22 Student Conduct
Academic Regalia Rules	UR003	University Rule	ECU Council	These Rules may be cited as the Academic Regalia Rules and are made pursuant to Statute 26 Conferal and
Admission, Enrolment and Academic Progress Rules	UR004	University Rule	ECU Council	These rules are made under Statute No. 30 Admission, Enrolment and Academic Progress.

(2) These Standing Orders are intended to result in: (a) better decision making by the Council and Committees; (b) the orderly and efficient conduct of meetings dealing with the University's business; and (c) greater understanding of the rules governing the conduct of meetings.
Fees Rules	UR007	University Rule	ECU Council	These Rules are made under Edith Cowan University Statute No. 31 Fees.
Foundation Rules	UR008	University Rule	ECU Council	These Rules are made pursuant to Statute No. 17 Edith Cowan University Foundation.
General Misconduct Rules (Students)	UR009	University Rule	ECU Council	These Rules are made under Statute No.22 Student Conduct
Library Rules	UR010	University Rule	ECU Council	These Rules are made pursuant to section 1(a) of Statute No. 4 - Rules of the University.
Student Guild Rules	UR011	University Rule	ECU Council	These Rules are made under Edith Cowan University Statute No. 11 Student Guild.
Student Services and Amenities Fee Rules	UR005	University Rule	ECU Council	These Rules are made to give effect, as required, to the provisions of Statute 29 Amenities and Services Fee.

## What is Webdrawer?

Webdrawer is a web-based search interface that allows read-only access to records.

It is a standard component of most HP RM installations, and is included within the base licence.

*What activities and resources are required to implement the search solution?*

The search solution will be implemented parallel to the existing webdrawer installation, requiring no additional server resources. Implementation in UAT and production involve the same steps.

- \* Change control and approval activities
- \* Provision of network login credentials, access and server permissions to login to server and modify existing web server configuration
- \* Deployment of the web application within the existing IIS web site
- \* Configuration of HP RM connection information
- \* Testing of implementation

*How does the search solution that IP is providing differ from webdrawer?*

In essence, the search solution is a "skin" that simplifies the search and results pages, providing a single search box, which executes a number of pre-set search criteria based on the user provided search term(s).

The results page is simplified to allow simpler access to electronic documents, and reducing the "clutter" of metadata fields that are not required.

## How to Buy

For more information regarding Websearch for HPE RM / CM, or to arrange a product demonstration or quotation please contact Sigma Data Solutions: Ph: +61 8 6230 2213 or email [sales@sigmadata.com.au](mailto:sales@sigmadata.com.au)

*Does this search solution put additional load on the HP RM system?*

Users who are performing queries within the search solution are performing a record search in exactly the same manner as they would within the HP RM client application.

Because the search criteria are predetermined, it is expected that users will find their required information quicker, using a single query. Some users may perform several queries within the HP RM client to locate the same results - making the search solution put less load on the HP RM system.

*Are any changes to the desktop environment required?*

No - the existing desktop environment supports the search solution with no additional changes.

*Is additional licencing required?*

No extra license cost is required to use WebSearch.
